

AIR

- Air pollution kills **one million people** in the world each year; in the US, it claims the lives of **50,000 people** annually.
- Acid rain causes **\$60 billion in damage** to streams, lakes, and forests in the US each year — and has left many lakes without fish.
- Air-borne mercury emissions from coal-fired plants harm **660,000 US children** per year.

Then the Lord God formed man from the dust of the ground, and breathed into his nostrils the breath of life; and the man became a living being.
—Genesis 2:7, NRSV

AIR

- Sources of air pollution include **factories, power plants, and vehicles**.
- Trees clean air and create oxygen, yet the world's forests are disappearing at the rate of **an acre a second**. Cities in the US have lost **20% of their trees** in the past 10 years.
- Dairy cow emissions are the **main source** of air pollution in some areas.

AIR

What you can do:

- Create less pollution by driving less, eating less meat, shortening your shower, and using compact florescent lightbulbs.
- Fight urban sprawl. Promote bike lanes and public transportation.
- Work for better regulations for factories and power plants.
- Plant a tree. Preserve the rainforest through NCP's *If a Tree Falls...*
