

WATER

- A **7-minute** shower uses **35 gallons** of water. That's more fresh water than **1.1 billion** people in the world have per week.
- A kilowatt of electricity requires **2 gallons** of water to produce. A pound of paper: **10 pounds** of water. 12 oz. soft drink: **60 oz.** Quarter-pounder: **200 gallons**.
- US golf courses use **4 billion gallons** of water a day; **25 million acres** of lawns in the US are irrigated.
- Main sources of **water pollution** in the US: livestock production, run-off from roads, powerplant emissions.

WATER

- In the US alone, **\$16 billion** is spent on bottled water per year; bottled water costs **1000x more** than tap water.
- Worldwide, **3-5 million** people die from water-related diseases annually.
- **40 percent** of the world's people depend on mountain glaciers for dry season water; thanks to global warming, these glaciers are disappearing.

And whoever gives even a cup of cold water to one of these little ones in the name of a disciple—truly I tell you, none of these will lose their reward.

—Matthew 10:42, NRSV

WATER

Solutions:

- Eat less meat.
- Use less energy. Stop global warming.
- Buy organic food. Don't buy bottled water.
- Think twice before watering the lawn.
- Support access to water as a human right.
